## **Mayes Testing Engineers, Inc. Grows Its Special Projects Department**

Lynnwood, WA – May 31, 2007 - Mayes Testing Engineers, Inc. (MTE) recently brought on board a new Special Projects Technician to meet the growing demands of its expanding business. Janine Burkhardt, a graduate of Cascadia Community College, has 11 years experience in environmental consulting and is a welcome addition to the MTE Special Projects Team.

MTE's Special Projects Department provides specialized testing and inspection services that range from verification of as-built conditions to damage surveys and investigative analysis for new structures, historical buildings and bridges. In her new role, Ms. Burkhardt will be responsible for conducting a range of investigative testing services.

MTE is a full-service testing and inspection agency. The company has grown from a 15- employee operation when MTE President Michael Mayes first acquired it in 1991, to over 100 employees today. The growing company has made it its business to ensure that the buildings it inspects go up, and stay up. "We inspect all the construction components, from the concrete to the welding to the masonry to the soil," says Mayes.
