MTE Hires New Tacoma Branch Manager

Tacoma, WA – May 7, 2008 - Mayes Testing Engineers, Inc. (MTE) has hired Shaun Sevigny as Branch Manager for its Tacoma office.

Sevigny joins MTE with 7 years of management experience in leadership of organizations performing multidiscipline engineering services including special inspection and testing, geotechnical engineering and environmental engineering. He is responsible for managing the branch office's laboratory, field inspectors and local projects.

MTE's Tacoma Branch Office has been providing testing and inspection services on South Puget Sound projects for more than 10 years. Recent projects include Emerald Queen Casino, Burien Town Square, Cabelas, University Place Intermodal Transit Facility, Capital Mall Expansion, Tacoma Community College Expansion, Pierce College Puyallup Expansion and many Tacoma and Olympia School District schools.

MTE is a full-service testing and inspection agency. The company has grown from a 15-employee operation when MTE President Michael Mayes first acquired it in 1991, to over 140 employees today. The growing company has made it its business to ensure that the buildings it inspects go up, and stay up. "We inspect all the construction components, from the concrete to the welding to the masonry to the soil," says Mayes.
